SOURCE

The following notice was published in the 10 December 1950 issue of the Soviet Zone Railroad Bulletin :

"Experienced civil engineers are invited to apply for positions with the Central Designs Bureau, to be attached to the Directorate General, Railroads, in Berlin. It will be the mission of this Bureau to prepare and estimate the cost of all major railroad construction projects in the Zone. Salaries will be granted on the basis of special contracts to be concluded." *

25X1A

Comment. The establishment of a central bureau for all development work in the field of railroad construction work has long been planned. The new bureau is to be assigned directly to the Director General, Railroads, and will thus work independently of Department VIII in charge of planning and statistics.
